

Integrated Quality and Environmental Policy Statement

Watterra is committed to:

- Implementing and maintaining an Integrated Quality and Environmental Management System which sets out the Company's objectives and targets for continual improvement in all areas of our operation and where we can have influence on improving any impacts on the environment.
- Maintaining processes to measure the quality of our performance throughout the organisation.
- The development of our people in order to continually improve our operating and environmental performance, taking into account technical developments within the industry, customer needs and the requirements of the community.
- Meeting our obligations to customers by striving to be at the forefront of technology within the groundwater and environmental monitoring industry and to bring to the market new and innovative products.
- Ensuring that we have the resources, personnel, equipment and the working environment to meet the continuing demands of the marketplace.
- The development and maintaining of strong communication channels with our customers and suppliers and anticipating and responding to their concerns about environmental issues and their impacts.
- Ensuring that all Company personnel are aware and committed to the Company's quality philosophies and policy in order to ensure that products and services are provided to customers on time and to the agreed specification.
- Undertaking our processes in a manner that is not detrimental to the environment or to the health and safety of societies inside and outside of our operations, and to prevent pollution.
- To comply with all applicable legal and other requirements to which we subscribe and which relates to our environmental aspects and quality of performance.

Signed.

A handwritten signature in black ink, appearing to read "Jonathan J. J. J." with a stylized flourish at the end.
