

Equipment Rentals

Equipment rentals

A convenient, cost effective alternative to purchasing - weekly rentals from Waterra

Why rent?

- No capital overheads.
- Eliminates equipment storage and maintenance costs.
- Equipment delivered to and collected from site.
- Try before you buy!

Approved Equipment

Data Loggers

PowerPack PP1 pump

Peristaltic pump

WaSP-F1 flow controller

Equipment Rental

Equipment Rentals

Description / Rental code	Applications	Other equipment required	Optional equipment
Levelogger S3001/LT-R 	Purpose Automatic logging of water level and temperature in water Typical projects Environmental / Dewatering / Pump tests / Slug tests	<ul style="list-style-type: none"> ● Laptop / PC ● Stainless steel suspension cable ● Stainless steel rope grips ● Water level dipmeter 	<ul style="list-style-type: none"> ● Leveloader Gold PDA ● Direct read cable ● Well caps or cradles ● Well slug and cable
Barologger S3001/BL15-R 			
Communications package S3001/Scm-R 			
PowerPack PP1 PP1/Rental 	Purpose A power actuator for mechanical pumping using Watterra inertial pumps Typical projects Routine groundwater sampling	<ul style="list-style-type: none"> ● Petrol (unleaded) ● Watterra inertial pump tubing and foot valves 	<ul style="list-style-type: none"> ● Watterra extension tubing ● Tubing cutters ● Valve tools ● Surge blocks
Peristaltic Pump S410/Rental 	Purpose For sampling where the water level is less than ~8 metres below surface Typical projects Low flow groundwater sampling	<ul style="list-style-type: none"> ● 12V DC power source* ● Drop tube (to sampling depth) 	<ul style="list-style-type: none"> ● Reducing adaptor kit (for 6mm tubing) ● Additional silicon tubing ● WQMP Multiparameter water quality meter and flow cell ● Sheffield LFC flow cell
WaSP 12V flow controller Wasp-F1/Rental 	Purpose For providing controlled low flow pumping rates from any 12V submersible pump Typical projects Low flow groundwater sampling	<ul style="list-style-type: none"> ● 12V DC power source* ● 12V submersible pump ● Discharge tubing 	<ul style="list-style-type: none"> ● WQMP Multiparameter water quality meter and flow cell ● Sheffield LFC flow cell

* Watterra recommend using a 12V marine battery.

To arrange your rental

3 simple steps are all that is needed.

- 1 Call or email us with your requirements.
- 2 We will send you a confirmation form by email or fax.
- 3 On acknowledgement from you we will reserve equipment for collection or for shipping to you.

Don't forget the accessories! Please ask our sales team for advice.

Weekly rental includes

- Standard or extended weekly rental options.
- All necessary manuals and instructions.
- Full equipment clean and test prior to despatch.
- Technical support by telephone where required.
- Safety compliant (CE marked) equipment.

All equipment is kept fully serviced and maintained between rentals.

Collection and delivery

- We can arrange next day delivery to site within the UK and Ireland - or you can collect direct from our warehouse in Solihull.

Field accessories and consumables

Gloves

Hard wearing, disposable, non-allergenic blue nitrile gloves.

Decon 90

For cleaning and decontaminating sampling equipment.

In-line filters

Certified in-line disposable filters for field filtration of water samples for inorganic and dissolved metals analysis.
